

JISHNU EK

Senior Flutter Developer | Mobile Architect

jishnuek23x5@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Senior Flutter Developer and mobile architect with 6 years designing, owning, and scaling production-grade cross-platform applications used by thousands of daily users. Proven track record architecting 30+ high-performance Android/iOS apps with a 99.9% crash-free session rate, building reusable frameworks and shared tooling that raise engineering velocity, and driving CI/CD automation (GitHub Actions, Codemagic) that cut release cycles by 40%. Uses Claude Code and GitHub Copilot daily to speed up boilerplate and debugging, always paired with a formal code review step to keep output reliable. Strong collaborator across design, product, and backend/platform teams, with a track record mentoring engineers and staying current with modern mobile architecture and AI-assisted development practices.

CORE SKILLS

- Mobile Architecture: Flutter, Dart, Clean Architecture, MVC, scalable app design, mobile architecture patterns
- State Management: GetX, BLoC, Riverpod
- AI / LLM-Assisted Development: Specialist in AI-API integration (OpenAI, Gemini) to drive intelligent app features; day-to-day use of Claude Code and GitHub Copilot for code generation, boilerplate, and debugging, validated through formal code review
- Cloud & Backend: Azure App Services, Azure AD authentication, REST API integration, Firebase (FCM, Analytics, Auth)
- Engineering Practices: CI/CD (GitHub Actions, Codemagic), Git, code review, test coverage, build stability, performance profiling
- Application Security: Vulnerability Assessment and Penetration Testing (VAPT), OWASP Mobile Top 10 remediation, secure coding standards, security compliance, penetration testing
- Tooling & Platforms: Shared component libraries, internal frameworks, Google Play & Apple App Store deployment
- Payments & Integrations: Cashfree, third-party SDK integration
- Collaboration: Cross-functional delivery with design, product, and backend/platform engineering; team mentoring

EXPERIENCE

Senior Flutter Developer

2022 – Present

Ihits Technologies Pvt. Ltd. — Kochi, India

- Architected and owned 30+ production-grade, cross-platform Flutter applications end-to-end — from initial design through long-term stability — serving customers across diverse industries with a 99.9% crash-free session rate.
- Built and maintained shared tooling and CI/CD pipelines using GitHub Actions and Codemagic, plus reusable Azure-based backend integration patterns, reducing release cycles by 40% and giving other engineers a faster, more confident path to ship.
- Implemented Azure AD authentication for secure sign-in across production apps, following security best practices for token handling and session management.
- Application Security: Conducted Vulnerability Assessment and Penetration Testing (VAPT) remediation, implementing industry-standard security controls and secure coding practices; applications successfully passed VAPT security audits prior to production release.
- Use Claude Code and GitHub Copilot daily to generate boilerplate and speed up debugging, pairing AI-assisted output with a formal code review step before merge to keep quality and reliability high.
- Measured and improved app performance, resolving critical bottlenecks and memory leaks that raised speed and user retention; used Firebase and Google Analytics to drive data-informed engineering and UI/UX decisions.
- Led code reviews and mentored a team of junior developers, raising code maintainability, documentation standards, and overall test coverage and code health across the codebase.
- Partnered with designers, product managers, and backend engineers to plan and ship full-stack features, translating requirements into scalable Flutter architecture.

Software Architect

2020 – 2022

Techtern Pvt. Ltd. — Kannur, India

- Spearheaded architecture and delivery of a flagship product-ordering application, owning technical decisions from design through release.
- Integrated the Cashfree payment gateway, enabling secure, seamless in-app transactions for end users.
- Implemented Firebase Cloud Messaging (FCM) for real-time push notifications and synchronized data updates, improving reliability of real-time features.

SELECTED PROJECTS

- **M-Rise (Dealership Management System):** Developed a multi-role Flutter application for vehicle service management supporting technicians, service advisors, managers, drivers, and security users, with role-based access control (RBAC) and real-time status tracking across the service lifecycle. Integrated Google ML Kit for OCR (image-to-text recognition), QR code scanning, and GPS location tracking to streamline vehicle check-in, document capture, and service workflows.
- **XYLEM – Talent XLA (HRMS):** Built the Flutter/Dart front end with GetX state management, lazy loading, and data caching, plus real-time FCM notifications.
- **Kalyan Silks (HRMS):** Delivered HR analytics dashboards with interactive charts and an optimized navigation/usability experience.
- **Kathiru (E-commerce App):** Built a full shopping experience — search, filters, wishlist — with real-time push notifications.
- **Cross-Platform POS System:** Built a Windows-optimized Flutter POS app with real-time sales analytics and inventory tracking.

EDUCATION

Master of Computer Applications

2018 – 2020

Kannur University Campus, Mangattuparamba
