

Summary

Senior Flutter Developer with 5+ years of expertise in mobile application development and software architecture. Designed and delivered 30+ high-quality, scalable applications for Android and iOS, maintaining a 99.9% crash-free session rate through rigorous testing and CI/CD automation. Expert in Clean Architecture, MVC, REST API integration and advanced Firebase ecosystem management (FCM, Analytics, Auth). Specialist in implementing AI-API integrations to drive intelligent app features, alongside Azure AD authentication and complex Payment Gateway integrations. Proven leader in collaborating with cross-functional teams and mentoring junior developers to drive technical excellence and seamless user experiences.

Skills

- Frameworks & Languages: Flutter, Dart, Clean Architecture ,MVC.
- State Management: GetX, BLoC.
- Cloud & Backend: Azure App Services, Firebase Integration (FCM, Analytics), REST API Integration.
- DevOps & Tools: CI/CD (GitHub Actions and Codemagic), Git, Version Control, Google Play & Apple App Store Deployment.
- Specialized: Payment Gateway Integration (cashfree and Razorpay), UI/UX translation, performance profiling.
- Engineered advanced app features including AI-API integrations, Azure AD authentication.

Experience

Ihits Technologies Pvt.Ltd

Kochi, India 2022 - Present

Senior Flutter Developer

- Architecture & Development: Engineered 30+ high-performance, cross-platform applications using Flutter and Dart, ensuring 99.9% crash-free sessions.
- Cloud & DevOps: Implemented Azure-based backend integrations and established CI/CD pipelines (GitHub Actions) to automate testing and deployment, reducing release cycles by 40%.
- Team Leadership: Mentored a team of junior developers, conducting rigorous code reviews and maintaining high standards for code maintainability and documentation.
- Performance Optimization: Resolved critical bottlenecks and memory leaks, significantly improving app speed and user retention rates
- Analytics: Utilized Firebase and Google Analytics to drive data-informed UI/UX improvements

Techtern Pvt.Ltd

Kannur 2020 - 2022

Software Architect

- Spearheaded the development of a flagship product-ordering application.
- State Management: Leveraged GetX for high-performance state management and dependency injection
- Real-time Features: Implemented Firebase Cloud Messaging (FCM) for push notifications and synchronized real-time data updates.
- Optimization: Employed lazy loading and local data caching strategies to reduce initial load times and improve offline capabilities.

Projects

XYLEM -TALENT XLA (HRMS)

- Developed the front-end using Flutter and Dart, delivering a seamless user experience.
- Utilized GetX for efficient state management.
- Enhanced performance with lazy loading and data caching, reducing loading times.
- Enabled real-time push notifications using Firebase Cloud Messaging.

KALYAN SILKS (HRMS)

- Contributed to an HRMS application tailored for Kalyan Silks, focusing on enhancing workforce management processes.
- Integrated interactive graphs and charts to display key HR metrics and analytics.
- Designed and optimized the user interface for seamless navigation and usability.
- Enabled real-time push notifications using Firebase Cloud Messaging.

KATHIRU (ECOMMERCE APPLICATION)

- Developed a product ordering application using Flutter Framework.
- Designed responsive UI/UX with product search, filters, and wish list functionality.
- Enabled real-time push notifications using Firebase Cloud Messaging.

POS SYSTEM

- Developed a cross-platform POS application using Flutter, optimized for Windows desktop.
- Implemented real-time sales analytics, inventory management, and customer data tracking.

Education

Kannur University Campus, Mangattuparamba
Master of Computer Application

2018 - 2020

Key Achievements

30+ Apps Built & Deployed

Successfully deployed 30+ mobile applications for various clients on the App Store and Play Store, delivering high-quality, scalable, and user-friendly solutions

Led Dev Team

Successfully led a team of developers, ensuring timely delivery of applications and seamless deployment across both platforms

Modern Integrations

Engineered advanced app features including AI-API integrations, Azure AD authentication, and real-time synchronization using Firebase Cloud Messaging
